Project 1: Securing a Business Network

<u>Securing the PC</u>

- Recommend an industry security baseline and justify the choice.
- Secure a Windows 10 PC following a security baseline.

<u>Securing Applications</u>

- Identify applications running on the sample computer, remove unwanted applications, and identify vulnerabilities and risks associated.
- Identify patching and updates of PC and applications and make setting changes.

<u>Securing Files and Folders</u>

- Identify the access of files and secure files.
